

MUHAMMAD TALHA YASIR

Full-Stack Web Developer; Laravel, Livewire & UI/UX Designer

Lahore, Pakistan | +92 3314488678 | talhayasir018@gmail.com

[LinkedIn](#) | [GitHub](#)

Laravel developer with 2+ years of professional experience building websites. Started on frontend and moved into full-stack work, and now working on backend features, REST APIs, and database design using Laravel, Livewire, and Filament. Currently teaching full-stack web development at KIPS, along with Laravel projects.

Skills

- **Backend:** PHP, Laravel (Livewire, Blade, Filament), REST API development, authentication and authorisation, queues and scheduled jobs.
- **Frontend:** HTML5, CSS3, JavaScript (ES6+), jQuery, Tailwind CSS, Bootstrap, responsive design.
- **Database:** MySQL, query optimisation, migrations, seeders, Eloquent ORM.
- **Tools and Deployment:** Git, GitHub, Composer, npm, Postman, Linux basics, deployment to shared hosting and VPS environments.
- **Integrations:** Third-party APIs and payment gateway integrations (Stripe, local providers).

Experience

Tech-Hub Instructor

Jan 2025 – Present

KIPS Education System

Lahore, Pakistan

- Deliver hands-on instruction across multiple domains including full-stack web development (HTML5, CSS3, Bootstrap, PHP, JavaScript, MySQL), freelancing fundamentals, e-commerce, video editing, Canva-based graphic design, and introductory robotics (theory & practical) to cohorts of 20–25 students through project-based sessions.
- Plan course structures and curricula across all taught domains, write practical assignments, and review student projects prior to completion and deployment.
- Mentor students one-on-one through debugging sessions, code reviews, and final deployment to shared hosting for web development tracks.
- Guide students through practical, real-world workflows including setting up freelancing profiles, building e-commerce storefronts, creating digital content, and assembling basic robotics projects.

Full-Stack Laravel Developer

2023 – 2024

BitLogicX

Lahore, Pakistan

- Started on the **frontend** and moved into **full-stack** work after the first few months, taking ownership of features end-to-end.
- Built **backend modules** and **database schemas** in **Laravel** and **MySQL** for client web applications, including **admin panels**.
- Developed and documented **REST APIs** that were consumed by **mobile apps** and third-party services.
- Worked on **debugging** and **performance fixes**; reduced slow query times by adding proper indexes and rewriting.

Front-End Developer

2022 – 2023

AUR LAB

Lahore, Pakistan

- Built responsive **UI** components using **Blade templates**, **Tailwind CSS**, and **jQuery**, working from **Figma** designs.
- **Tested layouts** across Chrome, Firefox, Safari, and Edge, and on common mobile screen sizes, fixing **rendering issues** as they came up.
- Worked closely with backend developers to integrate **Blade** views with **Laravel** controllers and form validation.

Projects

Final Year Project

Virtual cloth try-on e-commerce powered by AI-powered technologies has the potential to revolutionize online shopping by addressing the shortcomings of artificial intelligence. This technology allows customers to virtually try on clothing items prior to making a purchase, effectively addressing the ongoing issues associated with online apparel shopping, such as concerns about fit and style.

Society Management System

Web platform for managing residential community operations, including monthly billing, resident records, maintenance requests, and announcements. Built with Laravel, MySQL, and a admin panel.

Taxi Management System

Backend portal for fleet tracking and booking operations, with driver assignment, trip logs, and a basic dashboard for the dispatcher. Laravel + MySQL, with REST endpoints used by the mobile app.

Alert Web Application

Web application built around a user workflow process. Handled authentication, role-based access, and a review and approval flow. Stack: Livewire, Blade, Tailwind CSS, MySQL.

E-Commerce Store (Frontend)

Storefront with product listing, dynamic filters (category, price, availability), cart, and checkout pages. Frontend built in Blade, Tailwind CSS, and jQuery on top of a Laravel backend.

Education

Bachelor of Computer Science (BSCS)

2020 – 2024

Superior University, Lahore

Intermediate in Computer Science (ICS)

2018 – 2020

Government College of Technology (GCT), Lahore

Matriculation (Computer Science)

2016 – 2018

KIPS School, Lahore

Certifications and Courses

- AWS Cloud Architecting: Virtual Private Cloud (VPC)
- JavaScript and jQuery Development
- SQL Fundamentals: Database Management and Querying
- Web Design Master Classes

Extra-Curricular

Student Voice Leader (SVL) — *2020 – 2024* Served as a Student Voice Leader for four consecutive years, actively representing student interests and facilitating communication between the student body and institutional leadership.

Vice President, Student Body — *2022 – 2023* Elected as Vice President of the Student Body, responsible for coordinating student initiatives, supporting organizational governance, and advocating for student welfare at an institutional level.

Chairperson, IEEE Computer Society — *2023 – 2024* Led the IEEE Computer Society chapter as Chairperson, overseeing chapter activities, organizing technical events and workshops, and fostering a community of computing professionals among peers.

Languages

English (professional working proficiency), Urdu (native).
